Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

The internet is still quite a new development in technology, however, it is impossible to think about life without it. It works in a very simple way. It takes information and sends it from one computer

to another. It is not a difficult job, but it is a very big one. There are hundreds of millions of computers connected to the internet at the same time. However, they don't all do the same thing. Some computers are like a digital box that store information, (like videos or music files) that people see, read, or listen to. These stores of information are called servers, and there are three **categories**.

The first type is a file server, which holds ordinary documents. The second is a mail server for sending and receiving emails. The third is a web server for web pages. We know these servers store information, but how do people find this information or send it to each other? For this, you need a client.

A client is a computer that gets information from a server and **delivers** it to another computer. When you go online on your smartphone, you are using it as a client. **When two computers on the internet exchange information, they are known as peers.**

Peer-to-peer (P2P) communication is when you send someone a photo on your smartphone. When that person sees this photo, your smartphone is working as the server. It stores the photo, and the other person's device is the client, which searches for your information. It then displays the photo on the other person's screen.

(Adapted from Mindset for IELTS.)

Question 23: Which of the following is NOT mentioned as a type of server?

- A. File server B. Mail server C. Web server D. Game server

Question 24: The word "**delivers**" in paragraph 3 is OPPOSITE in meaning to _____.

- A. sends B. receives C. transfers D. transmits

Question 25: The word "**it**" in paragraph 1 refers to _____.

- A. internet B. technology C. way D. computer

Question 26: The word "**categories**" in paragraph 1 could be best replaced by _____.

- A. groups B. individuals C. levels D. stages

Question 27: Which of the following best paraphrases the underlined sentence in paragraph 3?

- A. Two computers are called peers when they share data on the internet.
B. A computer that shares information is always called a peer.
C. Peers are special computers that do not exchange information.
D. Computers exchange information only through a server, not directly.

Question 28: Which of the following is TRUE according to the passage?

- A. A file server is used for sending and receiving emails.
B. A client requests and receives information from a server.
C. All servers store the same type of information.
D. P2P communication always requires a web server.

Question 29: In which paragraph does the writer mention a smartphone being used as a client?

- A. Paragraph 1 B. Paragraph 2 C. Paragraph 3 D. Paragraph 4

Question 30: In which paragraph does the writer explain the different types of servers?

- A. Paragraph 1 B. Paragraph 2 C. Paragraph 3 D. Paragraph 4

Read the following passage about debate corner and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

[I] Digital media is any form of media that is created, viewed, and distributed via electronic devices.

[II] Examples of digital media include websites, social media, videos, video games, digital advertising,

software, and electronic books. [III] With the development of technology and smart devices in recent years, digital media saw a sharp rise. [IV] Below are two opinion pieces sent to our Debate Corner this week.

Nowadays, it is much easier and more convenient to access information via digital media. Most digital content is also **freely accessible**. All it takes is a few clicks, and you can read the latest news, watch videos, or see online adverts. In addition, digital media forms are more interactive. For example, customers can provide instant feedback, which can be used to solve any problems. In return, **almost every organisation can reach its target customers easily via digital media**. Furthermore, digital media is more flexible since information can be updated easily and frequently. By contrast, articles in printed newspapers or adverts on TV cannot be changed immediately. With more than 75 million social media users in Viet Nam and the number is increasing, it will not be long before traditional media becomes a thing of the past. (Minh Quang)

Digital media is very convenient, but its strengths are also its own weaknesses. Since anyone with access to computers and the Internet can post or share information online, it raises the question of how credible **it** is. On the other hand, traditional media offers information from reliable sources that are fact-checked. Moreover, let us not forget that digital media relies on the Internet and smart devices to work well. There are still remote or disadvantaged areas in Viet Nam where access to technology is **limited** or too expensive. Many people also still struggle with technology. So although digital media is on the rise, traditional media such as printed newspapers, broadcast TV, and radio is here to stay. (Pham Hoa)

(Adapted from Global Success 12)

Question 31. Where in paragraph 1 does the following sentence best fit?

This raises the question of whether digital media will replace traditional media such as printed newspapers, broadcast TV, and radio

- A. [I] B. [II] C. [III] D. [IV]

Question 32. The phrase “freely accessible” in paragraph 2 could be best replaced by _____.

- A. Available to everyone without restriction B. Hard to obtain without permission
C. Accessible only under certain conditions D. Limited to a specific group of users

Question 33. The word “it” in paragraph 3 refers to _____.

- A. Traditional media B. Digital media C. Online information D. The Internet

Question 34. According to paragraph 2, which of the following is NOT a benefit of digital media?

- A. Allowing users to provide immediate feedback B. Ensuring high accuracy of published content
C. Offering instant access to news and videos D. Updating information quickly and frequently

Question 35. Which of the following best summarises paragraph 3?

A. Digital media is more reliable than traditional media because it provides fast, accessible, and up-to-date information for everyone.

B. Traditional media is becoming obsolete as more people turn to digital platforms for news, entertainment, and communication.

C. While digital media is growing, traditional media remains important for its credibility and accessibility in areas with limited technology.

D. The Internet allows everyone to share information freely, but this also raises concerns about accuracy and misinformation.

Question 36. The word “**limited**” in paragraph 3 is OPPOSITE in meaning to _____.

- A. restricted B. insufficient C. unrestricted D. scarce

Question 37. Which of the following is NOT true according to the passage?

- A. Digital media is completely reliable because it provides fast and easily accessible information.
 B. Digital media allows for quick updates, while traditional media cannot be changed immediately.
 C. Many organizations use digital media to reach their target customers effectively.
 D. Some people still have difficulty accessing digital media due to technological and economic limitations.

- A. Traditional media is becoming less effective in audience engagement.
 B. Digital media allows businesses to connect with their customers efficiently.
 C. Online platforms fail to help companies reach their target consumers.
 D. Companies struggle to use digital media for customer outreach.

Question 39: Which of the following can be inferred from the passage?

- A. The rise of digital media will eventually replace traditional media as more people rely on online platforms for news, entertainment, and communication.
 B. Digital media has already led to the decline of print media, but television and radio will continue to thrive because they are still trusted sources of information.
 C. Despite the growth of digital media, traditional media will continue to be the main source of information due to its credibility and accessibility, especially in remote areas.
 D. Digital media mainly benefits businesses for marketing purposes, while traditional media will remain essential for providing reliable news and entertainment.

Question 40. Which of the following best summarises the passage?

- A. Digital media is more interactive and accessible than traditional media, making it the preferred choice for most people today.
 B. The rise of digital media has transformed how people access information, but its credibility and accessibility remain concerns.
 C. While digital media is growing rapidly, traditional media still plays an essential role due to its reliability and accessibility.
 D. Traditional media is outdated and will soon disappear as digital media continues to dominate information and communication.
